

## BIBLIOGRAPHY

### Research Bibliography of Alcohol and Kava Studies in Oceania: Update and Additional Items

PAUL FREUND and MAC MARSHALL

*Department of Anthropology, University of Iowa,  
Iowa City, Iowa 52242*

Marshall (1974) recently compiled a bibliography of research dealing with alcohol and kava use in the Pacific Islands consisting of 70 separate items divided more or less equally between alcohol and kava studies. Scholars familiar with the Pacific know that the preparation and consumption of kava by Pacific Islanders has caught the attention of outsiders for a long time and this fact is made apparent by the additional bibliography on alcohol and kava in Oceania provided below. Fully 63 of the 84 new items concern kava and a substantial number of these date from the nineteenth century. Six of the items listed below are updates of work mentioned in the 1974 compilation (e.g., papers read at professional meetings that subsequently have been published). Since much of the kava literature appears in languages other than English, we have provided translations of titles not readily comprehensible to persons unfamiliar with the language in question.

## INSTRUCTIONS FOR CONTRIBUTORS

Research reports, review papers, bibliographies, notes, and book reviews in anthropology and biology are accepted on the bases of their originality and their pertinence to Micronesia and adjacent Pacific areas. The language of publication is English, but summaries in another language are acceptable. Each manuscript received will be acknowledged and reviewed by at least two members of the editorial board or by specialists other than board members in whose field the paper lies. Authors will be notified as soon as possible on the decision reached. Contributors are asked to follow the instructions below and, in general, should adhere to the style and quality of papers in professional journals in their own fields. Manuscripts should be sent via airmail to the General Editor, *Micronesica*, The Marine Laboratory, University of Guam, P.O. Box EK, Agana, Guam 96910.

**Manuscript:** An original copy and one duplicate of each manuscript should be submitted. Text, tables, and legends should be typed on 8-1/2" by 11" nonerasable, white bond paper, double-spaced throughout. An abstract of not more than 300 words should be included for each research report. In the text, citations are to be made as follows: "it was stated (Smith, 1951) that..." or "Smith (1951) states...". References should be listed in alphabetical order by authors at the end of the text under the heading REFERENCES CITED as follows:

Gosline, W. A., and V. E. Brock. 1960. Handbook of Hawaiian fishes. Univ. Hawaii Press, Honolulu. ix+372 p., 277 figs.

Lessa, W. A. 1955. Depopulation of Ulithi. *Human Biol.* 27(3):161-183.

**Illustrative Matter:** All line drawings must be executed in ink and photographs must be of high-gloss finish. Illustrations in color will be printed only if the author bears the cost of reproduction. Legend for figures should be supplied on a separate page and placed with all figures at the end of text.

**Proof:** Page proofs should be corrected immediately by the authors and returned via airmail to the General Editor. Authors are reminded that only a minimum number of corrections and alterations are acceptable.

**Reprints:** Reprints may be ordered on a form sent out with the author's page proof.

VIEWS EXPRESSED BY THE AUTHORS ARE THEIR OWN AND DO NOT NECESSARILY REFLECT THOSE OF THE PUBLISHERS, EDITORS, PRINTERS, OR THE UNIVERSITY OF GUAM.
